11 December 2013

Dear Ms Quantrill

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

If you are carrying out this survey in order to help meet the requirements of the patient participation directed enhanced service (DES) for GMS contract, a guidance template for discussion of these local survey findings and an action plan have been included which may help facilitate discussions with your patient reference group (PRG).

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order to enable us to improve our services we would be grateful if you could complete a feedback form using the following link:

<http://www.cfepsurveys.co.uk/questionnaires/feedback/default.aspx?psid=151889>

Please contact the office on 0845 5197493 or reports@cfepsurveys.co.uk if you require further information about your report.

Yours sincerely

Helen Powell
Survey Manager

Sample questionnaire

Introduction

About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

*Based on data from 135 practices carrying out 202 surveys between April 2010 and March 2013 with 25 or more responses. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Please note the reliability of your patient feedback may be marginally reduced if less than 25 patient ratings per category is achieved. In the event that there are less than 5 patient responses for any question, the corresponding score will not be illustrated. Please see the supporting documents at the end of this report for percentage score calculation and quartile information.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- Open on weekends.
- I do not come here enough to comment. Thank you.
- The actual surgery needs a coat of paint and waiting room just breeds germs.
- I think the receptionists and the doctors are very good, and personally they couldn't be any better at this practice.
- I am satisfied.
- Very good to see doctor within the week.
- Some of the receptionist staff have a tendency to ignore you.
- I have been with the practice many years and I have been very happy with the service.
- I have been with this practice for many years and have always found the service excellent.
- Considering the huge number of patients, you offer a really first class service.
- If the staff and doctors pay more attention.
- Keep up the good work.
- Not really. Maybe some more magazines.
- Need more male related magazines in waiting room.
- At the moment the practice is doing well, if is not broken why fixing it?
- Sometimes it's difficult to find a parking, but I know this might be beyond the control of the surgery.
- I find the practice has a very good standard. I'm not sure how they could improve on this.
- Altogether excellent practice. No complaints. Other doctors that I've seen in the practice have also been very good.
- None.
- Being able to get an appointment sooner.
- None.
- It is fine to me.
- Should keep it up.
- Nice smells in the waiting room would be good!
- No, because the service etc. is excellent.
- Getting through on the phone is the main problem and seeing the doctor I want to. Today was very good.
- Giving out sooner appointment.
- Maybe more later evening appointments.
- No 3 waiting room could be improved.
- Sometimes it's very difficult to get see your own doctor if you have ongoing problems you need to see the doctor dealing with it.
- No comments. My doctor is very good to me.
- Fantastic.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- The practice is being run efficiently already.
- Very good overall!
- Better phone answering system.
- The doctors should be open up to 12 (midday) to have appointments. Also to have more appointments with my doctor.
- Never had to complain.
- Receptionists work really well and are very helpful. Definitely pay rise should be considered!
- Our family have been patients of this practice since the 1920s and we have always regarded it as first class.
- All the staff and clinicians work as a team, all of them are highly motivated, dedicated (with pleasant personalities) individuals. Keep up the good work, I cannot see how the service can improve, even though I believe in the Kaizen concept, i.e. continuous improvement.
- To answer the phone faster and not have all phone lines busy, also more late night appointments and for it to be easier to make an appointment.
- The practice has been my practice for many years and I would never change it. Excellent.
- I have been with this practice and quite a few doctors many, many years from a baby (now in my 60s).
- The service I got was excellent and cannot see any need for improvement.
- Very good.
- Very good.
- Access for prams and wheelchairs.
- Happy as it running at present time.
- No 0844 number.
- Waiting room 1, shabby, smelly - overall practice in need of refurbishment.
- I think it's very good practice.
- No comment - all seemed fine and welcoming.
- Sooner appointments when calling the doctors line.
- None, perhaps a text reminder for appointments.
- Saturday surgery would be a fantastic service.
- Any chance of Saturday morning surgery? It would be helpful.
- Toilets needed more attention.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how the doctor/nurse could improve?

- My doctor is excellent. No improvement necessary.
- This doctor is excellent - will be sorry when they retire.
- This doctor always puts me at ease, they are a very good doctor.
- By continuous professional training.
- There have been occasions when I've had to wait over half an hour past my appointment time, feel that there could be some improvement.
- You could not improve on anything with this doctor. He is a very good doctor. The only problem is that everybody wants him!!
- All the doctors I have seen have been excellent.
- None whatsoever. We are so grateful for the service.
- I think other doctors could learn a lot from this doctor's approach.
- They are very sincere and active.
- He is a wonderful caring doctor who takes time to listen.
- The best.
- None.
- Doctors are fine.
- None.
- Is information about hospital appointments available to the GP? No (why not?) but some other info is.
- You cannot improve on excellent.
- My GP is very caring and friendly. I have all praise for her.
- No improvement necessary.
- None, very friendly and warm doctor, who cared and was informative.
- I find this doctor very good.
- An excellent doctor I am lucky to have them.
- Great - very happy - thank you.
- This doctor is the best doctor you could ask for.
- Spend more time with the patient. Call in on time and have more appointments with my own GP.
- No improvement required - amazing lady!
- She is an excellent doctor - kind and caring.
- No improvement needed. She's just the best. Gives you the time and is very calm and patient.
- This doctor and her nurse could not be improved upon.
- The doctor is very dedicated, great personality. I have 100% confidence in her.
- My doctor is lovely and a great doctor. It's just too bad everyone else thinks the same so is very hard to get an appointment.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how the doctor/nurse could improve?

- This is the best doctor I have ever had. She understands me, listens to me and gives good advice.
- No, this doctor is very caring and will listen to what you have to say.
- The doctor was excellent, professional, caring and considerate. No improvements needed in my opinion.
- None. Already good. The best in the surgery because he listens and don't rush you.
- Very happy with doctors.
- No comments. Excellent service.
- Fantastic doctor only reason I moved to the surgery.
- I think he is very good doctor.
- They are all doing a great job.
- Fantastic doctor. The service has always been excellent with no complaints.
- Little bit more explanation, not to assume we know where certain departments are.
- No, I feel very well informed an involved in my healthcare.
- This doctor is excellent.
- None. This doctor is excellent.

Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 208

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	0	6	54	84	62	2

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{(\text{number of Poor ratings} \times 0) + (\text{number of Fair ratings} \times 25) + (\text{number of Good ratings} \times 50) + (\text{number of Very Good ratings} \times 75) + (\text{number of Excellent ratings} \times 100)}{(\text{Total number of patient responses} - \text{number of blank/spoilt})} = \frac{(0 \times 0) + (6 \times 25) + (54 \times 50) + (84 \times 75) + (62 \times 100)}{(208 - 2)} = 15,350/206$$

Your mean percentage score for Q1 = 75%

Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

Lower quartile, below which lies the lowest 25% of the data

The median, cuts the data set in half

Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)
Q1 Opening hours satisfaction	75

Benchmark data (%)*				
Min	Lower quartile	Median	Upper quartile	Max
23	64	68	73	92

9541

*Based on data from 927 practices carrying out 1,326 surveys between April 2010 and March 2013 with 25 or more responses.

Supporting documents

Page by page guide to the interpretation of your report

Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided.

The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

Page 5

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

Improving Practice Questionnaire

OFFICE USE ONLY	Org ID
